1. Claims 1-60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per independent claim 1, the phrase "floating point number **having** a sign bit and a mantissa **having a fraction portion**" (lines 1-2) is not understood. Is "fraction portion" a portion of the mantissa? The exponent "e" should be mentioned in the preamble or recited as input of the "fraction mask table". There is NO connection between the "fraction mask table" and "multiplexer". Similarly noted other independent claims 13, 21 33, 41 and 53.

As per dependent claim 26, the phrase "[t]he method of claim 1, wherein converting comprises:21" is mistyped.

As per dependent claim 40, the preamble is incomplete. It should dependent on claim 33.

2. Claims 1-60 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

4. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest the novel the "fraction mask table" and
